R✴HUB

Simple, Secure & Affordable Multi-Function Web Conference Appliance

TurboMeeting-200

Max Capacity: 4 meeting rooms, 20 concurrent users
Dimensions: 9" x 6" x 1.4"
Weight: 2.4 lbs
Network: 10/100 Ethernet
Power supply: 4.5W
Fanless

RHUB delivers its revolutionary TurboMeeting 3.0 as a simple, secure and affordable pre-configured appliance to enable fast and easy on-premise deployment behind the firewall. On-premise web conference has many advantages over hosted web conference services:

- **Secure conferences** assured by the firewall to reject unauthorized access to private meetings

- **Unlimited use and lower costs** results from the elimination of recurring payments to a third party

RHUB TurboMeeting 3.0 elevates Web conferencing by its unique ability to support both "fully interactive" and "view only" attendees in the same meeting. This means that EVERYONE can easily join a meeting. View-only attendees just point a browser to the meeting server and view the presenter's information in the browser. No download required!

RHUB web conferencing has been used for:

- Sales presentations and product demos
- Internal meetings within your network
- Remote support for your customers
- Remote training & seminars with non-download
- Remote access to your computers in office or home
- Engineering design coordination
- Any real-time collaboration where desktop sharing is needed

4-in-1
- ✔ Web Conferencing
- ✔ Remote Support
- ✔ Remote Access to My Computers
- ✔ Web Seminars

RHUB TurboMeeting 3.0 extends real-time collaboration well beyond the conventional web conferencing. It combines multiple applications into one delivery:

- **Web Conferencing** – web-based interactive meetings
- **Remote Support** – with remote reboot capability
- **Remote Access to My Computers** – remote access to computers at home or office from anywhere, anytime
- **Web Seminars** – non-download results in quick (in seconds), easy (URL only) and the most reliable way to join meetings

R★HUB

Main Features	Descriptions	Platforms
Present and control remotely	Everyone in a meeting can present what is on his computer screen. Everyone can control the presenter's computer with permission from the presenter.	PC & Mac
Application sharing	You can present one specific application and hide everything else on your screen to protect your privacy	PC & Mac
View-only with no-download	You can invite your attendees to join your meeting to view your presentation. This is commonly used for sales presentation, seminars, etc. No download is required. This feature is the most reliable and quickest way for your attendees to join a meeting. Only supports PC presenters.	All platforms (PC, Mac, Linux, Unix, iPhone)
Remote reboot	Easily reboot the supported computer remotely and continue your support session.	PC
Firewall friendly	Complies with existing firewall settings, without compromising security.	All platforms
Chat	Interactive meeting attendees can chat with each other. Chat sessions can be saved for later reference.	PC & Mac
File transfer	Attendees can send files (or directories) to all attendees or a specific attendee. Sending files can automatically continue when the attendee internet reconnects.	PC
Remote access computer	You can access your office or home computers from anywhere	PC
Auto-reconnection	It can easily happen that your or your attendee's internet disconnects in the middle of a meeting due to many reasons. Your meeting will continue as soon as the Internet reconnects. No need to restart or rejoin a meeting.	All platforms
Schedule Meetings	You can schedule meetings including recurring meetings	PC & Mac
Pause meetings	You can pause a meeting during the middle of the meeting to do something else that you don't want to share with your attendees.	PC & Mac
Annotation	Allows you to draw annotation marks anywhere on your screen to emphasize your points or ideas	PC & Mac
24 x 7 and no maintenance needed	The appliance operates 24 x 7. Firmware (including the meeting client software) is automatically updated. No maintenance is needed.	All platforms
