- Universal Attendance:
No download of any kind—
Everybody can join the meeting
- 4-in-1:
 - - Web Conferencing
 - - Remote Support
 - - Remote Access
 - - Webinar
- Free audio conferencing service
- Unlimited users
- No IT maintenance needed. Automatic updates.

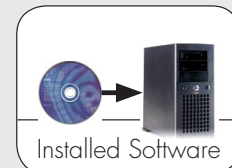

RHUB Appliance: The Best Alternative To Hosted And Software Solutions

Solutions for web conferencing, remote support, remote access and webinar are primarily delivered in one of two ways: via hosted (SaaS), or installed software. There are advantages and disadvantages of each. The RHUB appliance combines the advantages found in both models.

- No monthly fees
- Easy to deploy, one-time 10 – 30 minutes installation
- Harden on-premise security No IT maintenance needed. Firmware updated automatically.
- Full customization. APIs for integration with applications or websites

Benefits: <ul style="list-style-type: none"> • Easy to deploy • No IT maintenance 	Drawbacks: <ul style="list-style-type: none"> • Monthly fees • Weak security • No integration

3 – 5 month payback. Comparison of accumulated costs for 2 meeting rooms.

Month	TurboMeeting -200	WebEx Meeting Center	Citrix GotoMeeting Corp	LogMeIn
3	\$1,125	\$995	\$594	\$774
5	\$995	\$1,875	\$990	\$1,290
12	\$995	\$4,500	\$2,376	\$3,096
24	\$1,194	\$9,000	\$4,752	\$6,192

4-IN-1, OUTSTANDING VALUE

The TurboMeeting 4-in-1 appliance provides four solutions in one unit:

- **Web conferencing** – sales presentations, product demos, interactive collaboration
- **Remote Support** – remote desktop support for PCs and Macs
- **Remote Access** - access to office or home PCs from anywhere anytime
- **Web Seminar** – seminars for view-only attendees, guaranteed attendance

Hosted solutions require subscriptions to individual systems for each function, driving up your monthly fee.

YOU OWN IT, YOU CONTROL IT!

Technical Specifications:

Appliance installs on a LAN with 10/100 MB or 1GB Ethernet. Can be placed outside/behind the firewall or in the DMZ.

Supported operating systems;

The TurboMeeting Web conferencing appliance plugs into your network. You control users, access, and functions. You can authorize as many users as you wish, restrict the user to meeting types, or restrict meeting access by IP address as well as Meeting ID and Password. You can host unlimited meetings or support sessions with your employees behind a firewall or customers outside firewall.

You can brand the system and integrate it with your applications and websites. You can place "Host Meeting" and "Join Meeting" buttons on any external/internal home pages, or windows based applications such as audio conference or CRM systems.

Multiple Webcam Video

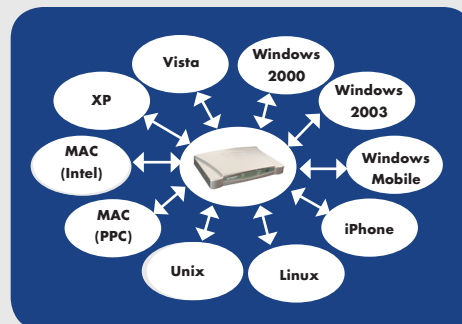

TurboMeeting Webcam collaboration supports up to 4 concurrent Webcams. The Presenter controls Webcam assignment. Any attendee that is using interactive mode with a Webcam can be displayed in the 2X2 matrix for all attendees. Both PC and Mac based attendees can use the Webcam.

UNIVERSAL ATTENDANCE – ANYBODY CAN JOIN THE MEETING

The patented Universal Attendance technology enables anyone with a modern browser, on any platform, to join a meeting. No download of any kind is required of them. The attendee is "view only" and can see the presenter's screen in a browser with the similar speed as the fully interactive client attendee who needs a download.

Just think - no firewall, antivirus products, lockdown computers, or unsupported platforms can keep your key meeting participants from joining. And, it is fast – just 5 seconds to join. No more waiting 10 and 15 minutes to start your meeting while everyone works to get clients downloaded and connected.

HIGH AVAILABILITY CLUSTER OPTION

The TM600/800/1000 Series supports a high availability option for mission critical applications. The back up unit automatically takes over when the primary unit fails. Meeting in process continue on the back up server.
