

R-HUB Video, Web & Audio Conference & Remote Support Servers

Your R-HUB conferencing and remote support server will give you six real-time collaboration applications:

1. Web conferencing – collaborate interactively
2. Remote Support – support PC and Mac users remotely
3. Audio Conference – computer & phone callers, FREE
4. Video Conference – support up to 30-webcam video
5. Remote Access – access PCs at home or office
6. Webinar – No download of any kind required for attendees

R-HUB has developed the real-time collaboration applications since 2003. In 2014, the R-HUB web conferencing solution was ranked one of the top three brands out of 35 most recognizable brands worldwide by Publicare in Germany, the most trusted global rating agent for web conferencing solutions. Today, R-HUB has over 4 millions of end users in over 20 major countries.

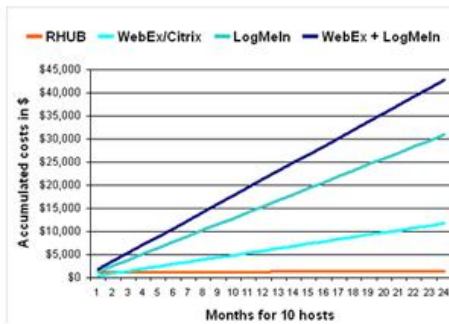

The Problems Experienced With Current Hosted Service Providers

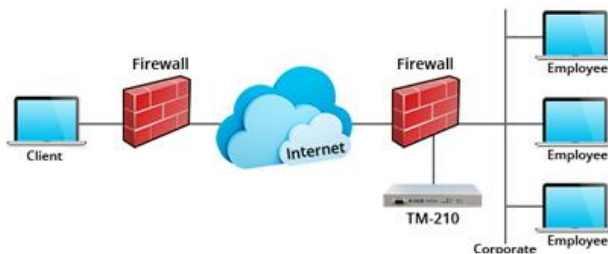

- Named licensing from hosted services are not cost effective. They are far too expensive to have every employee use the productivity tools that your company needs.
- It is difficult and expensive to manage several vendors for different collaboration tools.
- Hosting service providers put internal collaboration sessions at security risk, monitored by third-parties or government agencies.

R-HUB Solutions

R-HUB server uses floating licenses. This will allow you to provide collaboration tools and access to every employee --- at no additional cost. Plus, your R-HUB server can be paid off within 3-10 months of subscription fees for hosted services. LDAP integration is available for fast and easy deployment. Your R-HUB server will rapidly delivers a productivity boost to everyone in your organization. It is unmatched by any hosted service provider.

The R-HUB server comes with six real-time integrated collaboration applications in order to meet every employee's collaboration needs regardless of their department or location

The R-HUB on-premise server secures internal collaboration sessions enforced by your firewall.

The Values

1. Supports unlimited hosts. Floating licenses.
2. On-Premise: Security, Branding, Integration
3. Universal attendance capability. Platform independent.
4. 6-in-1 Capabilities with FREE audio conferencing
5. Plug and play. No IT maintenance needed.

Key Features

Meet and collaborate. Fastest speed.

R-HUB makes meetings easy. It is one of the fastest solutions in the industry. Anyone in a meeting can display his desktop or a particular application and have anyone else control his desktop.

See everyone face-to face

Simply click a webcam icon to meet and collaborate face to face in HD quality. Your R-HUB server can support up to 30 webcams for each individual meeting session with different display formats.

Talk using computers or phones. With FREE audio conferencing services.

You can talk to others while you meet by simply using your computer or headset microphone, or with your cell phones, smart phones or landline telephone. R-HUB provides free dial-in numbers in 17 countries. The enterprise caliber audio conferencing service is free.

Collaborative remote support and knowledge sharing

Remote supporter invites additional staff, employees, clients and partners to join a remote support session. The R-HUB server empowers your supporter and session attendees to collaboratively resolve issues, provide training to internal staff, and share

Key Features

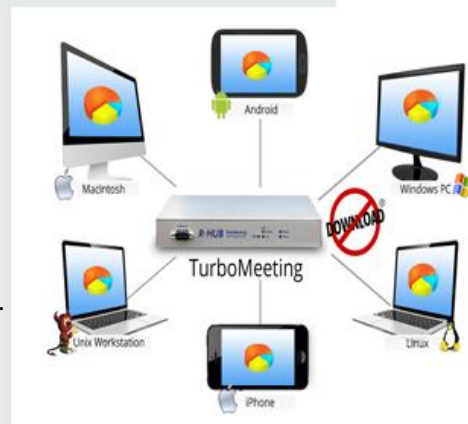

Remotely access your computer desktop, applications, and files.

Quickly and easily work with a remote computer as if you were sitting in front of it. Work from home or on the road.

Webinar - No Download of Any Kind

A webinar attendee only needs to view the presenter's screen together with a telephone call for audio. Your R-HUB TurboMeeting functionality, with its patented technology takes advantage of this simple requirement and provides a fast way to join a webinar. It requires no download of any kind. Participants join webinar in only 5 seconds! Your attendees are virtually guaranteed problem-free access when joining your webinars. As long as an attendee has an Internet browser on their computers or mobile devices, s/he can join.

Record and publish

You can record everything in a meeting including desktop updates, audio from phones and/or computers, and webcam video. You can easily convert the recording to standard formats: AVI, FLASH, and WMV.

Support mobile devices

R-HUB TurboMeeting supports any mobile device including iPad/iPhone, Android, Windows and Blackberry. In addition, the R-HUB iOS App allows you to control remote computers.
